#### NOTES

- [1] Inductive load life, 20,000 cycles.
- [2] Ratings are for double make terminal type 2, 4 & 6.
- 3. Alternate contact configurations and other special models available upon request. Please contact factory.
- [4] Greater values for suppressed coils.
- 5. Terminal strength per para. 3,4,8,2,1 of MIL-R-6106.
- [6] Suppressed "N & NY" coils have back EMF suppression to 62 Volts max.
- [7] Suitable for transfer between unsynchronized power sources at rating shown.
- [8] Economizer coils have a lower resistance primary coil for faster operate time. Once relay operates, the coil switches to a higher resistance for lower power drain. Do not ramp up voltage on these coils.
- [9] Non hermetic gasket sealed version.
- 10. This series drawing is for general use only. Please consult factory for special requirements.
